International Conference on
Circular Economy for Climate and Environment (CECE) 2023
26-27 September 2023 Sydney

Invitation

The circular economy for climate and environment (CECE) is an annual international multi-disciplinary conference covering a wide range of topics with themes related to circular economy in water, energy, environment, waste, resource recovery, climate change, etc. The conference provides a platform for the researchers from the academia, industries, government, and NGOs globally to come together and share the research works covering both fundamentals and applied research. The conference also is aimed at promoting network among the researchers and foster international collaborations. The conference will feature several eminent plenary and keynote speakers from academia, industry and government.

You can choose from a set of sponsorship packages available or request a program specifically tailored to suit the need of your organisation.

About the Event

The conference brings together delegates from around the world to discuss in a range of applications covering the following themes:

- Environmental pollution (water, wastewater and air)
- Environmental Technologies
- Climate change: impacts mitigation and adaptation
- Resource recovery from wastes
- Water, energy, and environment
- Circular economy

For further information, visit the CECE website at: <https://www.nicecece.org/>
